Subject: Remainder of EW Draft FS

Ravi,

The remainder of the draft East Waterway Feasibility Study has been posted to the East Waterway website. This includes text, tables, and figures for Sections 8-11, the Executive Summary, and the appendices. EPA login information is below. We have only posted the files to the EPA website and not the stakeholder website.

As you work through these files, please let us know if you think of additional information that would support your review (we have additional info with more detail that wasn't included in the report).
